Title Index

Application of the ORESTE method to a nuclear waste management problem 29

Behavioral implications of the learning curve for production capacity analysis 157

Calculation of operational performance ratings, The 165
Characteristics of logistics management in 23 Finnish companies 175
Customs clearance and electronic data interchange — A study of Norwegian freight forwarders using EDI 91

Design and implementation of a maintenance planning and control system 263
Design of maintenance concepts 217

Economics of pipeline maintenance and replacement 273
Empirical study of a new procedure for allocating safety stock in a wholesale inventory system 181
EUT maintenance model, The 209
Evaluation methods of standard software with respect to their effectiveness 249

Feeding parts to an assembly line by several production units 77

Inventory structure in the manufacturing industry — A cross-country inventory comparison 19

Just-in-Time logistics of a supplier in the car manufacturing industry investments 55

Logistics management: a method for evaluation of production–distribution investments 115

Master production scheduling: a function based approach 65
Maximizing throughput by evaluating critical utilization paths 191
Modigliani–Hohn model with capacity and warehousing constraints, The 49

Optimal spare allocation problem based on the interval estimate of ability 285

Quality and productivity: the linkage 137

Relevance lost? A critical discussion of different cost accounting principles in connection with decision making for both short and long term production scheduling 1
Reliability of equipment: yesterday's research and tomorrow's requirements, The 235
Revising models of maintenance and inspection 227

Safety stock optimization in multi-stage inventory systems 103
Short term inventory and employment adjustment dynamics in Finnish forest industry 129
Simulation analysis of a JIT production line 147
SPARTA II: Further development in an expert system for advising on stocks of spare parts 291
Staff oriented simulation of new production systems 199

Technical audit: How to assess the technological standard of a company 41

Use of knowledge-based systems in evaluation and enhancement of maintenance routines, The 243
